EXECUTIVE REPORT DIGEST • Generated: June 21, 2026 • Baseline Assessment

1. Executive Scorecard

KPI Metric	Current State	Target Range	Status
Business Health Score	41.49%	> 85%	Critical
Customer Satisfaction Index (CSI)	35.0%	> 80%	Needs Uplift
Average Churn Risk	58.5%	< 30%	Elevated
Operational Risk Index	47.5%	< 30%	Elevated

2. Strategic Findings & Top Risk areas

Our operations intelligence algorithms report that the **Staff/Support Issues (5 negative reviews)** represents the single highest risk sector. This area currently impacts approximately **5 users**.

Critical Executive Action: Launch automated AI customer service agent to handle repetitive refund/FAQ inquiries and resolve peak-hour hold-time spikes.
Expected Outcome: Improve customer satisfaction metrics and relieve staffing load.

3. What-If Strategic Scenario Simulations

Using historical correlations and category regression models, we have simulated the outcomes of specific operational upgrades to compare their return-on-value metrics.

Scenario Preset	Projected CSI	Churn Drop	Revenue Recovered	Health Index
Increase Support Team by 15%	41.25% (+6.2%)	-9.5%	■4,750.00	47.23%
Improve Delivery Performance by 25%	43.75% (+8.8%)	-8.1%	■4,050.00	47.84%
Reduce Payment Failures by 30%	38.75% (+3.8%)	-8.6%	■4,275.00	45.86%
Improve App Stability by 20%	36.25% (+1.2%)	-2.4%	■1,187.50	42.79%

4. Tactical Action Roadmap & ROI Metrics

Priority Action	Timeline	Difficulty	Revenue Gain	CSI Lift
Optimize Delivery Routing & Spill-Guards Recalibrate dispatch buffer limits, roll out spill...	2 Weeks	Medium	■3,543.75	+6.8%
Stabilize Checkout API Flow Roll back recent frontend check-out release and co...	1 Week	Low	■831.25	+0.7%
Establish Secondary Gateway Fallback Configure automatic API retry handling and integra...	4 Weeks	High	■2,493.75	+2.0%
Deploy Support AI Autopilot Integrate AI agent to resolve refund/coupon issues...	3 Weeks	Medium	■3,325.00	+3.4%
